NAME OF
ROAD
STATE
ATLANTA

THIS IS UNEVALUATED INFORMATION

25X1

1. A hard surfaced road **#924** runs from Lvov to Zbarazh via Ternopol. It is over two lanes wide and is in good condition. The road is constructed for heavy usage. It has a good solid foundation and many military vehicles, as well as civilian and commercial cars, travel it between Lvov and Ternopol. the trucks were tarpaulin covered.
2. A loose surface all weather road **#903** runs from Zbarazh northeast to Ivanchany, where it veers and goes southward to Ternopol. This road also is in good condition and runs through hilly terrain. The road is over two lanes wide, has a solid foundation and gravel surfaced.
3. A number of loose surface all weather dirt roads **#935** run in the vicinity of Moviki, Ternopol, Zbarazh and Zarudze. These dirt roads are over two lanes wide and occasionally absorb heavy usage.
4. Farmers and villagers maintain and resurface the dirt roads. However, during rains or whenever the Seret and Onila overflow, two small streams running north-south parallel to the roads, the dirt roads become potholed and deeply rutted so that it is easier to get off the roads and travel on the fields.
